## 5. (U) Logistics:

a. Logistical activities for the period of this report consisted of normal resupply of the battalion. Approximately 39,200 miles were traveled by Service Battery elements in support missions and 741 tons of ammunition were transported by the ammunition trains.

b. During a portion of Operation Junction City, ammunition was hauled from the Long Binh Ammunition Supply Point by the ammunition trains. Over a twenty-seven day period, 678 tons of ammunition were transported from Long Binh to Lai Khe.

## 6. (U) Civic Action:

a. Food and cooking supplies were distributed to the villagers at Phuoc Nguyen.

b. The battalion surgeon and medical section participated in the MEDCAP program. Approximately 600 people were treated during the quarter in the villages of Long Khan, Phuoc Nguyen, Thanh Nguyen, Nuoc Trong, Long Thanh and Xon Von.

7. Psychological Warfare: 28 propaganda shells were fired by Battery A in the vicinity of Bau Bang on 20 March.

### PART I, OBSERVATIONS

1. (U) Personnel and Administration. NONE

2. (U) Intelligence. NONE

3. (U) Training and Organization. NONE

4. (U) Operations:

a. ITEM: Direct Fire Sectors.

(1) DISCUSSION: In position areas, especially those out of base camps, howitzer parapets and other structures can restrict direct fire to the extent that it cannot be integrated into the base defense.

(2) OBSERVATION: Parapets, bunkers, and other structures must be planned and constructed so as to allow maximum coverage from howitzers for direct fire and Beehive employment.

b. ITEM: Location of Aiming Circle.

(1) DISCUSSION: Because of the requirement for referring and relaying the battery when large shifts are necessitated, the executive officer's aiming circle must be accessible to the executive post and protected against enemy fire.

(2) OBSERVATION: The aiming circle should be built directly into the executive post bunker in order to protect the aiming circle and executive officer and facilitate its use while under mortar or ground attack.

c. ITEM: Firing Battery Communication.

(1) DISCUSSION: Wire communications from the executive post to the fire direction center and from the executive post to the guns are vulnerable to being knocked out by enemy mortar fire.

(2) OBSERVATION: Both hot loop and direct line communications should be established from the executive post to the guns, utilizing the MX 155, and an AN/PRC 25 should be located at the executive post for radio communications with the fire direction center.

d. ITEM: Self-illumination with the 105mm Howitzer (Towed).

(1) DISCUSSION: Experience has shown that often the quickest and most satisfactory means to illuminate a firing battery position area is for the battery to fire its own illumination.

(2) OBSERVATION: The most effective data for firing self-illumination with the 105mm howitzer (towed) is: Charge 1, Time setting - 3.7, Quadrant 1146.

4. (U) Operations:

a. Battery commanders must insure that bunkers and other construction do not interfere with the ability of the battery to employ its direct fire capability.

b. The aiming circle should be built into the executive post bunker to provide protection from enemy mortar fire.

c. Alternate means of communication should be established between the executive post and the guns, and the executive post and the fire direction center.

d. The data for self-illumination should be readily available at the firing battery at all times.

1. (U) The quarterly report submitted by the 7th Bn, 9th Artillery  
is considered adequate.

2. (C) Reference Section II, Part I paragraph 4a, Direct Fire  
Sectors. Each artillery battery firing position should be assigned a primary  
and alternate direct fire sector. The recent ground attacks, by the  
enemy, on artillery fire bases in the III Corps area emphasizes the  
need for and the devastating effect of direct artillery fire.

3. (C) Reference Section II, Part I paragraph 4b, Location of  
Aiming Circle. Proper positioning and protection of the aiming circle  
is essential not only for the frequent relaying of the firing battery,  
but as an emergency alternate aiming point in case aiming stakes are destroyed  
or blown down.

4. (C) Reference Section II, Part I paragraph 4d, Self Illumina-  
tion. Recommend that data charge 1, time setting 3.7, quadrant 1146 be  
used by all 105T batteries.
